ASSEMBLY INSTRUCTIONS

SETTING UP / STORING AWAY

INFLATING:

1. Check your surroundings for any sharp objects on the ground/floor that may cause damage to the bed (nails, screws, sharp rocks, etc.)
2. Unfold the bed and lay it flat on the floor.
3. Make sure the pump is in the "OFF" position and connect the electric pump to a power socket.
4. Fit the Largest adapter to the pump.
5. Locate the inflation valves on the bed.
6. Open both caps on each valve. You need to open the outer cap AND the inner cap.
7. Inflate the Main Chamber (lower valve) on the bed to about 80% with the pump.(about 4 min.).
8. Immediately close the inner, one-way valve cap. DO NOT OVERINFLATE.
9. Switch the pump adapter to the Middle adapter and use the inner, one-way valve to complete inflation until desired firmness is reached, as shown on the right.
10. Follow the inflation instructions in Steps 7 for the Upper Valve.
11. Close the outer cap on the valves, and push each valve flush into the bed.

DEFLATING:

1. Open BOTH valve caps as in Step 6, and let the air flow out. If desired, you can put an adapter on the "DEFLATE" input on the pump to assist in removing the air.
2. When the bed is nearly fully deflated, fold the left side and the right side of the bed to the center, leaving the middle with the valve flat.
3. Begin to roll up the bed from the bottom to assist in releasing any remaining air.
